

HIGH RESOLUTION VIDEO RF FILTERED INTERFACE VERSION 2.0 UHD/HDR

STEHR210

Overview:

The STEHR210 is a Single Channel Lab Grade High Resolution RF Isolated Interface. It is designed to HDMI 2.1 specifications which will allow the unit to pass High Resolution Video communications up to 48Gbps data speed. However at the time of this datasheet, the STEHR210 has only been tested to HDMI 2.0 specifications at 18Gbps data speed. HDMI 2.1 specifications are not guaranteed. The conductive insertion loss will be greater than 90dB within the 500MHz to 40GHz band. This makes the STEHR210 ideal for isolating even those low band LTE and 5G frequencies. The unit is fully backward compatible to HDMI 1.4.

Applications:

The primary application is for use in an RF Shielded Test Enclosure. The STEHR210 allows High Resolution Video data to pass while maintaining an enclosure's RF isolation. The interface will also work well in RF Screen Room applications, or anywhere you need to pass HDMI data and maintain RF isolation.

Features:

- HDMI Input and Output connectors.
- Single Flange Nut for mounting.
- Gasket Washers to provide a high quality RF bond.
- Includes 12VDC 2 Amp 24 Watt Switching Power supply with 5 different world plugs.
- Port Savers.
- Strain Relief Post.
