

## RF200 Broadband Antenna

The RF200 is a calibrated broadband antenna which enables direct measurement of field strength over the full radiated emissions spectrum.

### Specification

<b>Frequency range :</b>	30MHz to 1GHz
<b>Antenna factor:</b>	Curve issued with each antenna. Data pre-loaded into EMCE software supplied with Laplace EMC kits
<b>Calibration :</b>	Tested at NPL free space antenna test facility.
<b>Ancillaries :</b>	SA1020 pre-amplifier(Optional)
<b>Type :</b>	Modified log periodic
<b>Size :</b>	Length                1.7m Max Width            1.6m
<b>Tripod Stand :</b>	Construction -Tubular fiberglass /epoxy supports and molded plastic fittings.
<b>Adjustable height :</b>	1.1 to 2.1m
<b>Antenna Orientation :</b>	Vertical or horizontal
