

Sunol Sciences Corporation

Antenna Towers

- 1-4 meter antenna height standard, 6 meter optional
- Electric height adjust
- 1 cm height resolution
- Low-stretch mylar rope suspension (750 pound breaking strength)
- Pneumatic polarization standard
- Safety brake
- Zero maintenance
- Boresight model available
- Absolutely no conductive material above motor box
- Fiber optic interface standard
- Extremely low emissions
- Height and polarization switches located at tower
- Molded, one-piece foot and trolley
- Strong, stable construction
- Easy assembly
