

Antenna Tripod Model J-100-2

J-100-2 Tripod

J-100-2 Tripod shown with JB6 Antenna and TRAM-1 Mount

Equipment for 4x5, 5x7 and Medium Format (4 1/4" Crown)

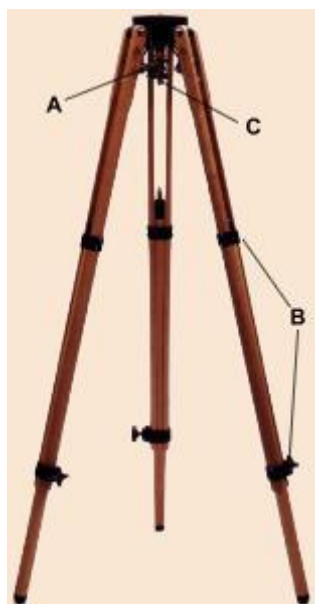

MODEL	WEIGHT	FOLDED HEIGHT	MAX. HEIGHT	RECOM. HEAD	RECOM. EXT. LEGS	MAX. CAMERA WT.	PRICE
J 100-2	11 lbs.	40"	62"	J Series	A 700	25 lbs.	\$761.00

Tripod features the Tri-Lock mechanism, are made of hardrock maple, can lower to 12" at maximum leg spread, and are available with 1/4-20 or 3/8-16 mounting screws. J Series is for 4 x 5, 5 x 7 and Medium Format

Sunol Sciences Corporation

A. Rider clamping screw loosens for movement of leg up to 90°. Tighten to secure leg.

B. Leg extension locking screws loosen for raising or lowering of legs, or to reverse leg from rubber pad to spike.

C. Spring-loaded camera screw. Pull down, set head and screw head down.

Extension legs are designed to increase the height and flexibility of your RIES tripod. Each leg is composed of two outer brackets and an inner extension leg, just like your tripod, along with 2 clamps and a center band. All you need to do is extend each of your existing inner tripod legs 3" and clamp the extension legs onto them for a secure fit. Then you may adjust each segment as desired.

MODEL	WEIGHT	MIN. HT. ADDED	MAX. HT. ADDED	FOLDED HEIGHT	TRIPOD MATCH	PRICE
A 700	7 lbs.	30"	51"	27"	J100-2	\$250.00

Carrying cases are made of durable, weatherproof Cordura™ on a sturdy but lightweight frame of foam rubber, and are lined with fleece. All cases are monogrammed with our logo and come with full-length zipper, white piping, and both hand and shoulder strap.
