

KeyTek EMCPro®

**Cost-effective upgrades now available to meet
IEC 61000-4-4 Edition 2 and IEC 61000-4-11 Edition 2**

From Thermo Electron Corporation, the leader in EMC Test Solutions ...
New upgrades to make your EMC Pro fully compliant with the latest IEC standards revisions.

With the highest test levels, widest selection of test capabilities, and lowest cost, the KeyTek EMCPro meets and exceeds the requirements for a wide range of engineering and manufacturing test challenges. Now, upgrading to new test requirements and standards is as simple as adding these new options!

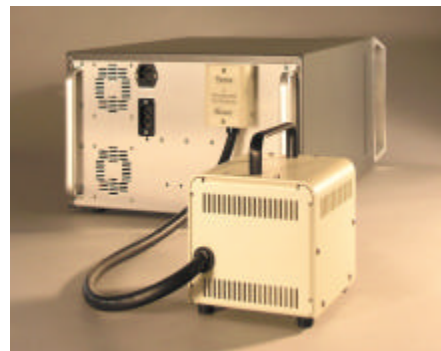

KeyTek PRO-SW-EFT

This upgrade gives you the critical capability to meet new requirements for a 100 kHz burst rate per IEC 61000-4-4, Edition 2 (EFT)

KeyTek PRO-80-PQF

External transformer ensures compliance by adding the 80% dip level required by IEC 61000-4-11, Edition 2 (PQF).

To add these upgrades to your KeyTek EMCPro, or for additional information, please call Ron Ahlquist at 800-753-9835, ext. 328, or contact your local Thermo representative.
