

# G05

## TruPwr™ Detector 50 Hz - 3.8 GHz

## Applications

The AD8362 detector is mainly used to measure the power of wireless communications (GSM/CDMA/TDMA... Waveform and modulation independent)

## Specifications

Antenna shape	Differential U form
Antenna length	27 mm x 2
Detector	AD8362
Frequency	50 Hz to 3800 MHz
Unit	dBV
Input dynamic range	-70 to -20

## Example

Radio transmitter  
433 MHz
