Please refer to the information as below when you view data.

- 🔊 Instrument used for the measurement : Network analyzer Agilent 8753C
- 🔊 the Size of Measurement Sample : Out-diameter Φ 38.8mm x Inner-diameter Φ 16.9 mm x thickness 5.2t, 6.3t, 6.7t mm
- 🔊 Material : Powder used in the Ferrite Tile (Material Name : 3R2A, 3R2B)
- 🔊 Thickness : 5.2t, 6.3t, 6.7t
- 🔊 Measurement Items : Permittivity(Real & Imaginary), Permeability(Real & imaginary)
- 🔊  Reflection Loss(dB) is calculated by 4 measurement items
- 🔊 Data in the Attached file : reflection loss, Permittivity, permeability
