

Facing new challenges in technical, productivity and economic sectors, NEXIO has developed BAT-ELEC, the only software which realizes transitional electrical tests compatible with generators of all customers and for all standards (civil, automotive, aeronautic, ...).

6 Reasons to choose BAT-ELEC

- 1 software for all your equipment
- 1 software for all standards
- 1 software for your electrical and EMC tests
- Advanced functions of monitoring and control
- Automated reports
- Team of specialists at your disposal

DRIVERS

- All brands: HAEFELY, EMTEST, TESEQ, EMC PARTNER, Hilo, Schlöder, ...

STANDARDS

- Automotive: ISO 16750-2 / ISO 7637-2
- Aeronautic: DO-160
- Civil standard: IEC 61000-4-4 (burst) / IEC 61000-4-5 (surge)
- Other standards and specifications

SUPPORT

- Experienced and dedicated technical support
- Adaptation to changes in standards
- Driver development

Integrated BAT-EMC

- Project management
- Automated reports
- Integration of metrology
- Data sharing network
