

RSM-02 Remote Switch Module

Product Overview

Flexibility The TDK RSM-02 Remote Switch Module works in conjunction with the TDK SI-300 System Interface to process switching commands for the test system. It consists of a fiber optic communication link and power supply. Each switch module is capable of driving four independent RF switches. In addition, all of the sensing circuitry is also monitored to assure a proper contact closure.

Automation Several remote switch modules can be controlled together so that the entire test system can be switched automatically.

Design Features The primary power button consists of a backlit push panel indicator which activates both the switch driver power and the fiber communication link.

Applications

- System switch control
- Automated switching system

The TDK RSM-02 Remote Switch Module operates in conjunction with the TDK System Interface to process switching commands.

System Features

- Fiber optic communication
- The ability to automate switching using the SI-300
- Each module capable of driving four Independent RF switches
- Gives system operator control over switch status using the SI-300
