

Wide Band Communications Antennas

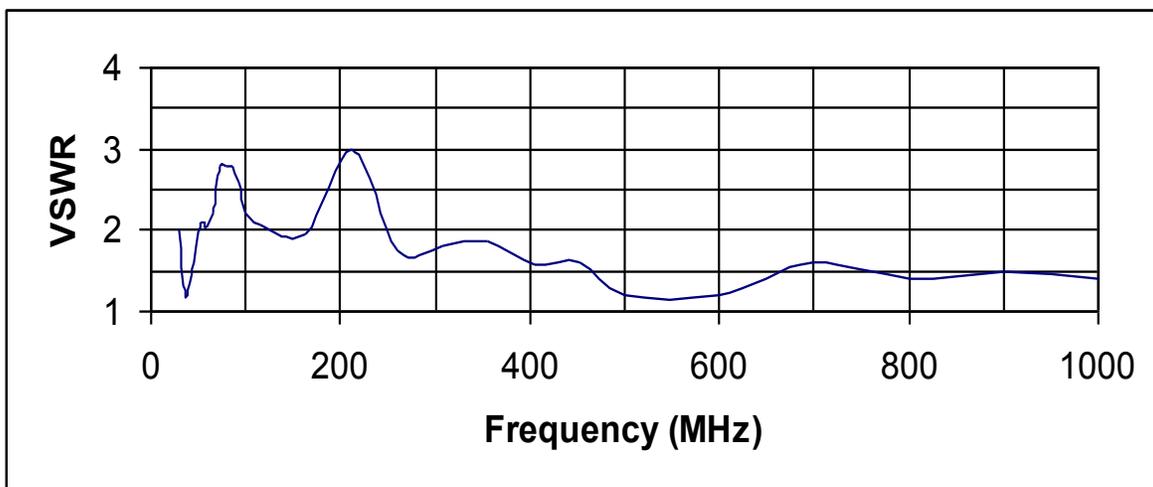

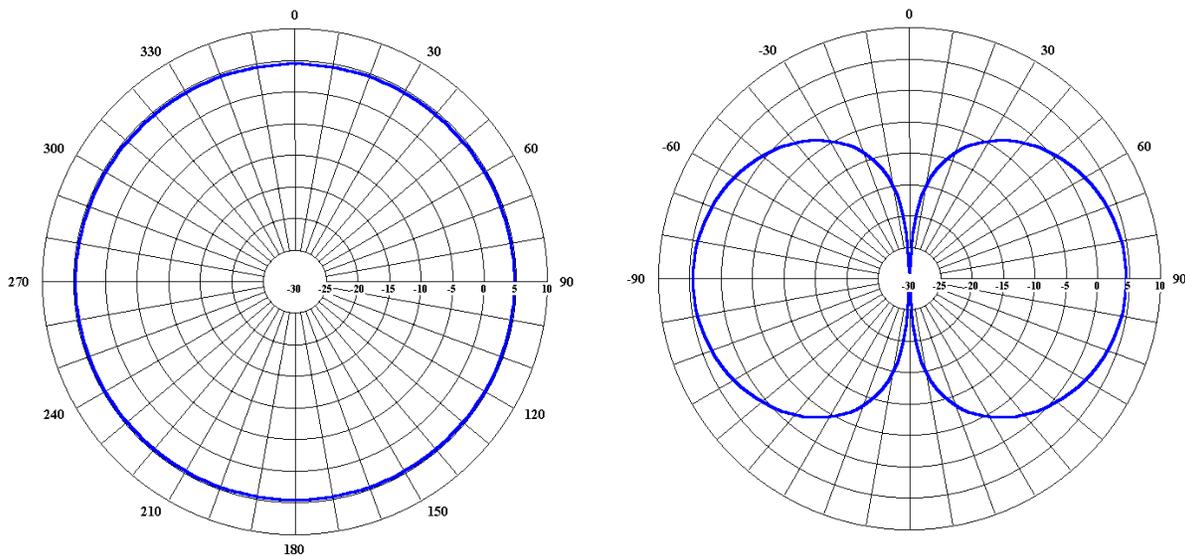

- ◆ **Multi-Octave Bandwidth**
- ◆ **Linear Polarization**
- ◆ **Rugged Construction**

The BC-7350 is a very wide band, biconical transmit/receive antenna. The welded structure makes for a very rugged, outdoor, biconical antenna. The result is a commercially priced antenna with the toughness and performance of a military antenna.

Specifications

Model:	BC-7350
Frequency:	25-1200 MHz
Gain:	4 dB (center frequency)
Power:	1000 watts (cw)
Polarization:	Linear (typically vertical)
VSWR:	2.0:1 typical 3.0:1 maximum
Beamwidth:	360 x 85 degrees (center frequency)

Mechanical Specifications

Dimensions:	73.5" x 48"
Weight:	32.6 lbs.
Temperature:	-20 to +150 F
Winds:	to 45 mph (with optional guy kit)
Environment:	commercial/industrial (mil spec available)
