

## FLOOR STRUCTURE COMPONENTS

### USING AL20 EMI SHIELDED FOIL (Epoxy Floor with Perimeter Flashing)

4" x 4" or 6" x 6" 26 Gauge Galvanized Steel L Flashing is Typical  
Wall Shielding Attaches to the Vertical Portion of the Flashing  
Clear Zinc Coated Screw Anchors in to the Metal Wall Stud to Ground the Floor Shielding

No Concrete Products in the Epoxy

AL20 Can be Butt Jointed or Overlapped and Seam Taped  
With AL5 or CU50 ECPSA Foil Tape  
Depending on the Shielding Effectiveness Required
