

# High Voltage Switches

HS 10 -  
HS 50

rugged  
safe

High-voltage switches HS \*\*\* have an electromagnetic drive, which moves the switching element out of the home position. The switch comes back to the home position due to gravity force. Besides standard switching applications, these switches are therefore suitable as safety ground switches.

Type:	Switching mode:	Working voltage:
HS 10	break	10 kV =
HS 10-2	break/make	10 kV =
HS 20	break	20 kV =
HS 50	break	50 kV =
