

Anti Interference Isolating Transformer

STT 250

surge voltage proof

anti interference

The anti interference isolating transformer STT 250 suppresses electromagnetic interference of electronic equipment generated by disturbances of the mains power supply and by cable shield and case currents due to potential rise of the ground system. It excels by its specified surge voltage proof and excellent filter characteristic and is suitable for supply of sensitive measuring equipment or personal computers.

Technical specification:

Rated voltage	primary / secondary	230 V / 230 V \pm 5%
Nominal output power		250 VA
AC test voltage	primary / secondary	2.5 kV \approx / 1 min
Surge test voltage		20 kV, 1.2 / 50 μ s
Dimensions		190*250*265 mm ³
Weight		7.5 kg
